October 14, 2009 – Credit Management Company Partners with BillingTree to Provide Web Integrated Payment Solutions

Pittsburgh, PA - Credit Management Company announces the upcoming launch of our new web payment site for on-line bill payments.

With millions of consumers now paying their bills on-line, web payment portals have become a powerful vehicle among the business community. This new option provides an additional, convenient channel for a debtor to pay their bill at any point in time. Payment options include checking accounts, savings accounts and major credit cards. Web payments will be transacted in a secure data environment, with all compliance assurances.

Debtors that have accounts in our full collection department will be driven to a payment website via our collection letters: www.paycmc.com. All account information concerning the web transaction will be encrypted while it resides on the database waiting to be processed; therefore, remaining in compliance with the upcoming Red Flag Rules identity theft regulations scheduled to go in effect on November 1st.

Providing an additional 24/7 option for debtors to make a payment is expected to further increase the volume of cash recovered for our clients. Debtors currently are able to make payments via mail, live agent telephone call, or their telephone key pad.

Credit Management Company is a full service accounts receivables management company located in Pittsburgh, PA. The company was founded in 1966 on the concept of saving organizations time and money through the rapid recovery of receivables. With clients in industries such as medical, financial, government, education, and retail, CMC offers a wide range of services including automated outbound calling, pre-collections, early out services, and debt collections. For more information, visit our website at www.creditmanagementcompany.com or call 1-800-472-1483.
